

# LEONARDO REBONATTO

## FULL STACK DEVELOPER

With over 8 years of experience in IT and more than a decade of dedicated study, I am driven by a deep passion for computing and its transformative applications. My mission is to apply the knowledge I have gained over the years while continuously evolving with the latest advancements in technology, particularly in Artificial Intelligence. I thrive on innovation, problem-solving, and leveraging IT to create meaningful solutions.

## EXPERIENCE

### SR SOFTWARE DEVELOPER

SITEC SOLUÇÕES INDUSTRIALIS - 05.220.948/0001-76

01/2022 - Present

Development of Industry 4.0 solutions, optimizing processes and enhancing operational efficiency. I have designed and implemented solutions currently used by the world's largest breaded and sausage factory (JBS). Today, I continue to improve and maintain these systems, ensuring reliability, scalability, and innovation in industrial automation.

**Tech Stack:** JavaScript · API · AWS · TypeScript · Application scalability · Firebase · Angular · Git · Laravel · PHP · Postgres · Ionic · NoSQL · MVC · Node.js · Docker · Data analisys · Redis

### FOUNDER AND CTO OF PANDEV TECH

PANDEV DESENVOLVIMENTO DE SOFTWARE - 53.055.392/0001-52

05/2019 - Present

I am the founder and CTO of PANDEV TECH, a company specializing in custom software development, websites, and e-commerce solutions. For over five years, we have been delivering innovative, tailor-made digital products that empower businesses across various industries. I lead a team dedicated to building cutting-edge technology solutions while also providing strategic IT consulting to help companies implement scalable and efficient systems. Our track record is defined by successful projects, strong partnerships, and a relentless commitment to excellence and innovation in technology.

**Tech Stack:** Project management · Tech lead · PHP · Javascript · Development coordination · Python · Angular · SQL · Wordpress · e-commerce development

## EDUCATION

### TECHNICAL COURSE IN COMPUTER SCIENCE

Federal Institute of Santa Catarina  
2014 - 2018

### BACHELOR OF SCIENCE IN COMPUTER SCIENCE

Universidade Federal da Fronteira Sul  
2019 - 2024

### POSTGRADUATE IN ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING

PUC Minas  
2025 - present

## LANGUAGES

Portuguese - Native

English - Proficient - 8 years

Spanish - Mid level - 2 years

Japanese - Begginer - 1 year

## SKILLS

PHP (Laravel/Symfony/Zend)

Javascript (+Typescript)

Node.js (Adonis/Express)

Web development (Angular/React)

Mobile development (Ionic)

Ruby on Rails (V3, V4 & V5)

Python (Django/web2py)  
ORM (Eloquent/Doctrine/ActiveRecord)  
SQL (Postgres/MySQL/NoSQL)  
HTML5 & CSS3 (Sass/Less/Bootstrap)  
Cloud (AWS - GCP - Azure)  
Containers (Docker - Kubernetes)  
Git (Github - BitBucket - Gitlab - SVN)  
Machine Learning (TensorFlow, Pandas)

## SR FULL STACK DEVELOPER

SGI SISTEMAS GERAIS E INFORMATICA LTDA - 56.067.200/0001-16

11/2024 - Present

As a senior software developer at SGI, I contribute to the evolution of Solidus Smart, a robust ERP solution serving furniture and appliance retail businesses across Brazil. My role involves developing new features, optimizing system performance, and refactoring legacy code to enhance maintainability and scalability. I work closely with cross-functional teams to improve application efficiency, ensure seamless integrations, and implement best practices in software architecture.

### Key contributions:

- Feature Development: Implementing new functionalities to meet the evolving needs of retail businesses.
- Code Refactoring: Improving maintainability and performance by restructuring legacy codebases.
- Application Scalability: Optimizing database queries, caching strategies, and microservices to handle increasing loads.
- Cloud & DevOps: Managing deployments and infrastructure using AWS and Docker.
- Database Optimization: Enhancing performance with PostgreSQL, SQL query optimization, and Redis caching.

**Tech Stack:** Ruby on Rails · JavaScript · API Development · AWS · Docker · Git · PostgreSQL · MVC · Redis · SQL Optimization · Data Analysis

## PL SOFTWARE ENGINEER

IMOVAGO SERVICOS DE INFORMACAO LTDA - 34.081.413/0001-60

01/2023 - 12/2023

Worked as an IT consultant for Imovago, a leading real estate solutions company in Santa Catarina, Brazil. Focused on ERP and marketplace integrations, database optimization, and back-end improvements, ensuring greater efficiency and scalability for the platform.

### Key Contributions:

- System Integration: Developed seamless integrations between the company's ERP system and real estate marketplaces, optimizing data exchange.
- Database Optimization: Improved SQL query performance in MySQL, reducing latency and increasing scalability.
- Access Control Implementation: Designed authentication and authorization mechanisms to enhance system security.
- Back-End Enhancements: Optimized Eloquent ORM usage, improving query efficiency.

**Tech Stack:** JavaScript · API · AWS · TypeScript · Application scalability · Firebase · Angular · Git · Laravel · PHP · Postgres · Ionic · NoSQL · MVC · Node.js · Docker · Data analysis · Redis

## ○ **SR FULL STACK DEVELOPER (FREELANCE CONSULTANT)**

TRAFEGUS SISTEMAS CHP SOLUCOES LTDA - 11.007.847/0001-14

10/2023 - 02/2024

Worked as a full stack development consultant for Trafegus Sistemas, a B2B logistics solutions company. My role focused on integrating web systems built in PHP with Node.js APIs, maintaining and improving a mobile app in Ionic, and managing relational databases to enhance system performance.

### **Key Contributions:**

- Web System Integration: Developed seamless integrations between PHP (Zend Framework) applications and Node.js APIs, improving system interoperability.
- Mobile App Maintenance: Ensured the stability and efficiency of a hybrid Ionic application through continuous optimization.
- Database Management: Administered and optimized PostgreSQL, improving scalability and performance.
- Code Optimization & Best Practices: Implemented OOP and TypeScript improvements, while enhancing collaboration and version control via Azure DevOps.

**Tech Stack:** Ionic Framework · Azure DevOps · Android Studio · PHP (Zend Framework) · Node.js · TypeScript · PostgreSQL · JavaScript · REST API · Docker · Database Management

## ○ **WEB DEVELOPER**

TWOWEB AGENCIA DIGITAL LTDA - 18.113.831/0001-35

06/2020 - 01/2022

I played a key role in developing dozens of websites for businesses across various industries, overseeing projects from design conception to final implementation. Additionally, I was responsible for performance optimization and SEO strategies, ensuring greater visibility and efficiency for clients.

### **Key Contributions:**

- Web Development: Designed and implemented responsive websites and e-commerce platforms using PHP, Ruby on Rails, and WooCommerce.
- SEO & Performance: Applied advanced SEO techniques to enhance website ranking in search engines.
- Security & Infrastructure: Implemented cybersecurity best practices and managed server infrastructure using Docker.
- Maintenance & Optimization: Ensured high performance and stability by continuously maintaining and improving websites and systems.

### **Tech Stack:**

Responsive Web Design · WooCommerce · Git · Ruby on Rails · MySQL · React Native · Cybersecurity · E-commerce · JavaScript · SEO · Docker · PHP
